Understanding the Concept of Product Service Systems (PSS)

PSS is transforming industries by shifting from traditional product sales to **integrated product-service solutions**, optimizing resource use, reducing waste, and driving sustainability. But how do these models work, and what challenges must businesses overcome?

The Vision of PSS-Pass Project

The **PSS-Pass project** aims to enhance sustainability and efficiency by integrating **advanced digital technologies** into PSS models. By leveraging AI, IoT, and data-driven insights, the project seeks to transform how businesses manage products and services, fostering transparency, collaboration, and circularity.
